

Plastia Doppio (EN)

Selfwatering pot

Ideal for growing herbs and indoor plants. Combination of glossy and matte finish of the top and bottom parts in soft pastel shades. You can rotate the inner part and create the shape of either a leaf or a flower. The selfwatering system works in both cases.

Substrate quantity: 1,2 l

Water capacity: 0,25 l

Fill the upper part of the pot with substrate. The lower part of the pot is for water – you can fill it with up to 250 ml of water. There is a self-watering wick which collects the perfect amount of water your plant needs to keep it hydrated!
